Accessories for TREK 700 Series

RoHS COMPLIANT 2002/95/EC

Features

Advantech mounting kits and accessories are the best companion products for our vehicle mounted computers.

- Shock and vibration absorption
- Fully adjustable positioning
- Simple and quick attachment

Introduction

Advantech RAM mounting kits are the perfect choice for securing vehicle mounted computers to vehicles on the move. RAM mounting kits come with a double ball and socket system which can absorb harmful shocks and vibrations. They are designed to absorb a shock of up to 50 G and will hold vehicle mounted computers solidly in place even in the harshest of conditions. The double ball design of the RAM mounting kits is fully adjustable. It can be positioned in different ways for the perfect viewing angle.

All these RAM components are 100% interchangeable, so if you decide to switch items from one vehicle to another, simply swap them out with a turn of the knob. There are many different, non-destructive RAM mounting bases that will quickly attach and fit every lift truck cage made. They have been tested on vehicles from Toyota, CAT, Daewoo, Komatsu, Yale, Hyster, Clark, Mitsubishi, Nissan, and many others.

RAM-MOUNT-01

Features

- Mount units up to 4.5 kg
- Aluminum construction
- Fully adjustable positioning
- Meet VESA standard
- Clamp base

RAM-MOUNT-02

Features

- Mount units up to 4.5 kg
- Aluminum construction
- Fully adjustable positioning
- Meet VESA standard

RAM-MOUNT-03

Features

- Mount units up to 6.75 kg
- Aluminum construction
- Fully adjustable positioning
- Meet VESA standard

TREK-UNIARM-01

Features

- Flexible mounting solution for industrial vehicles
- Rotation range is 15° ~ 360°
- Uses latches to adjust the angle

I/O-CV-01

Features
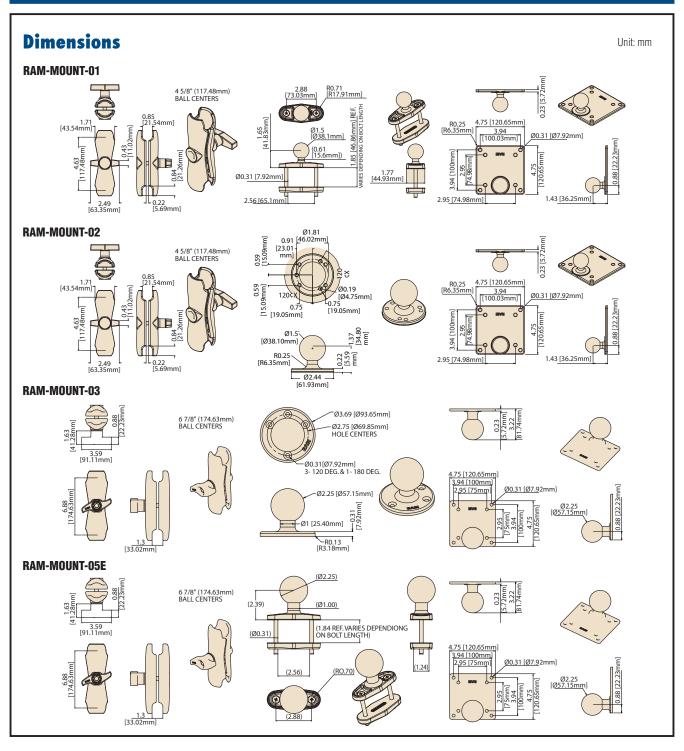

- Stainless I/O port protective cover
- IP53 compliant

RAM-MOUNT-05E

Features

- Mount for units up to 6.75kg
- Aluminum construction
- Fully adjustable positioning
- Meet VESA standard
