Real-time Data Query

The data will be refreshed within 5 seconds at the fastest when temperature and humidity fluctuate.

Extended Battery Life

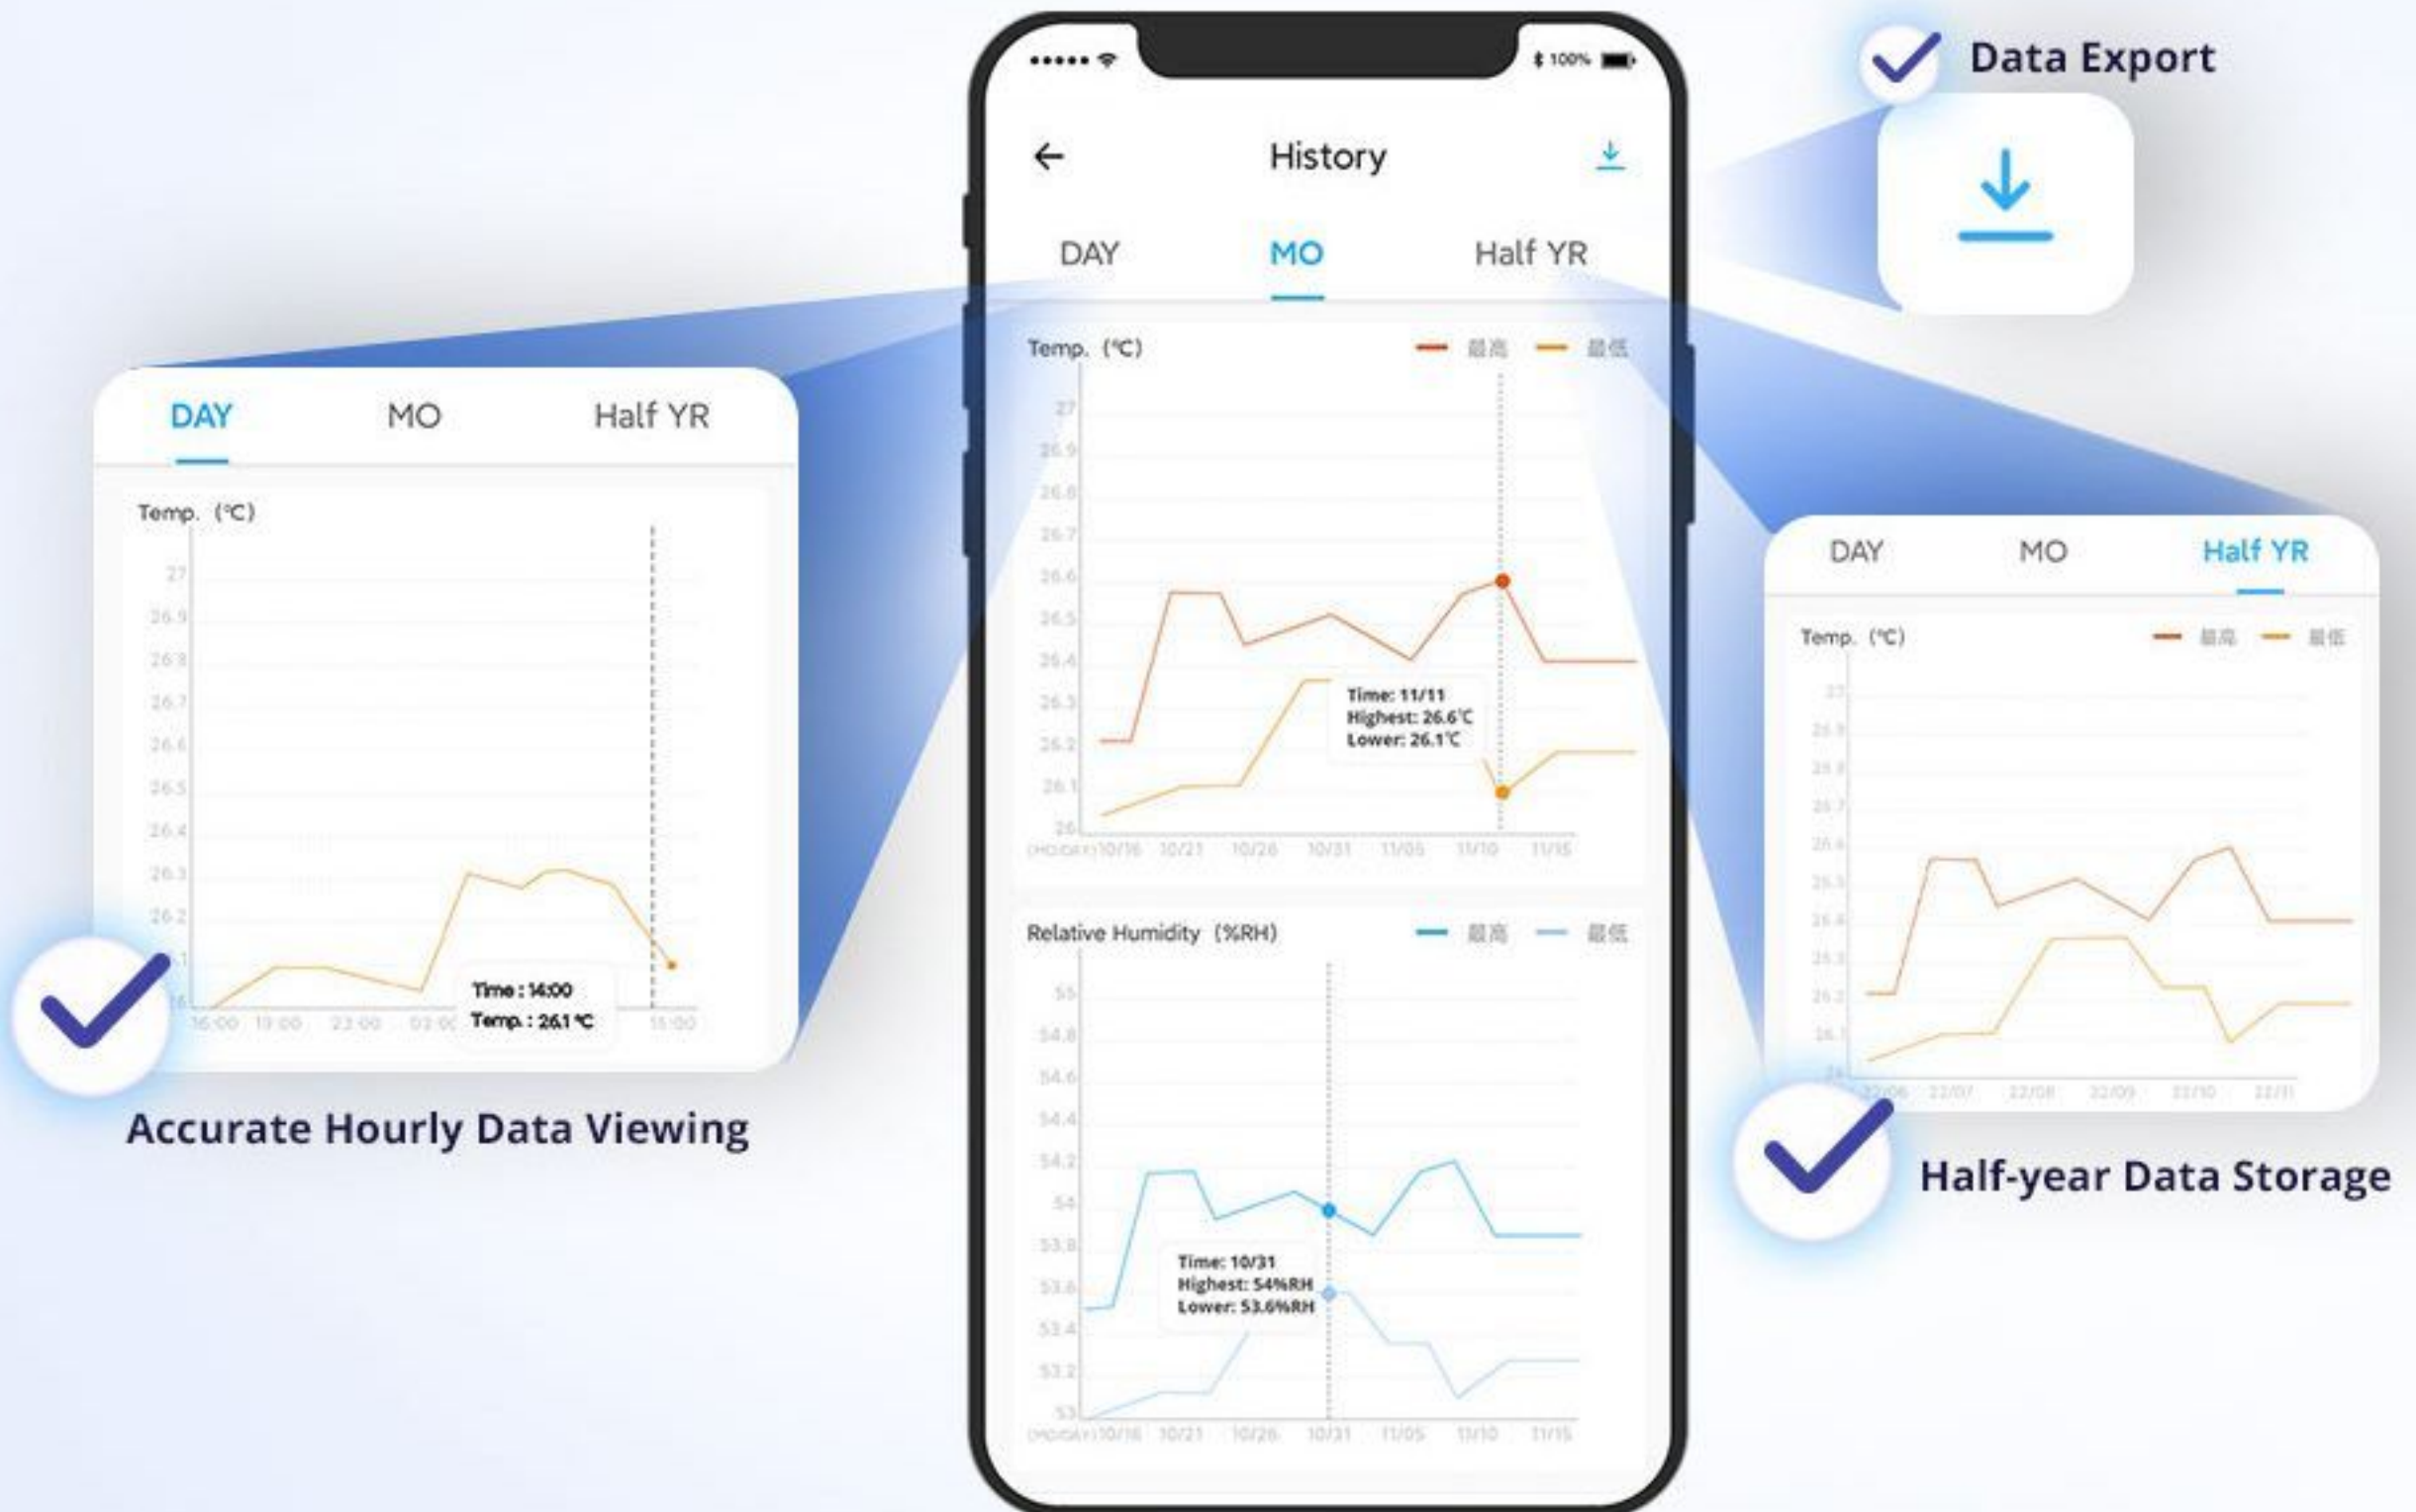

The battery life has been increased to more than four years. No longer have to worry about running out of power.

*The battery life data is a theoretical value, obtained from SONOFF's internal laboratory under a specific test environment. Actual use may vary slightly due to product differences, firmware software versions, operating conditions, and environmental factors.
Please refer to the actual use.

Recording Data, Recording Life

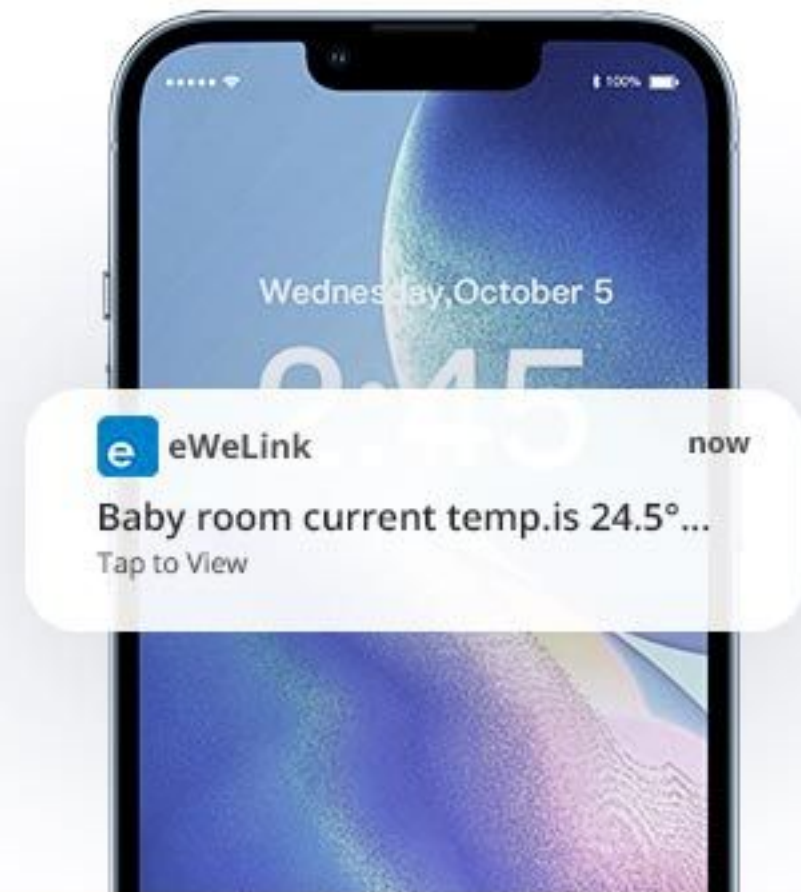

Supporting cloud-based historical records, the temperature and humidity data of each day will be stored in the App. You can easily access the temperature and humidity variations for each day, month, or every six months through real-time queries. Additionally, you can download the data to enhance your living environment based on temperature and humidity trends.

Maintain Room Comfort

When the room temperature or humidity exceeds your set comfort range, you will receive immediate notifications on your phone, helping you maintain room comfort and ensuring life quality.

Create Smart Scenes, Embrace Comfortable Lifestyle

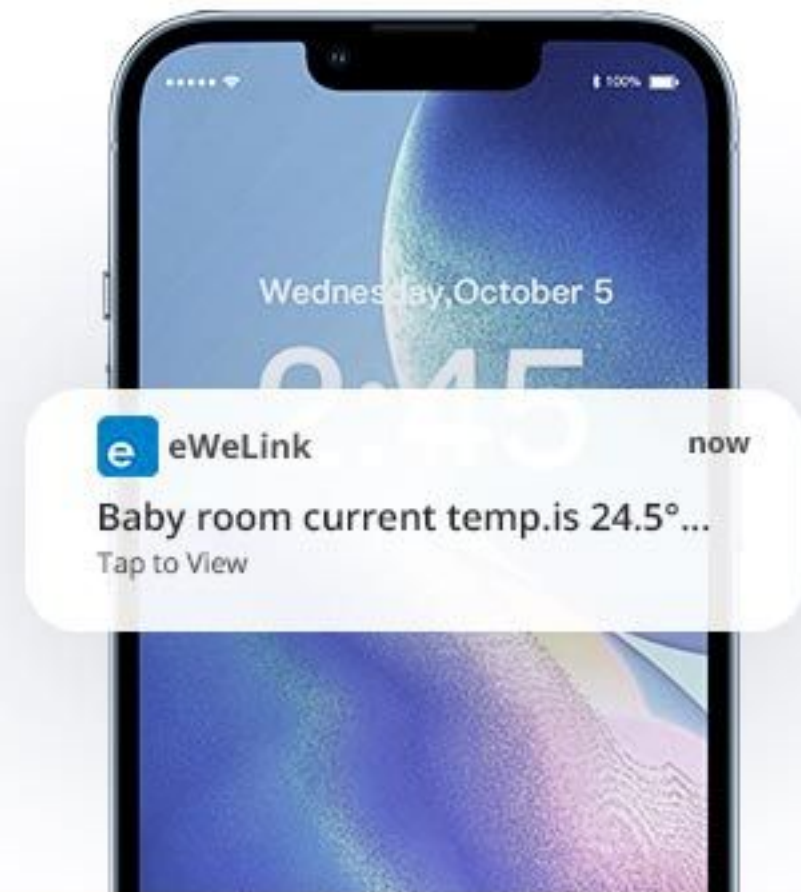

Set up Smart scenes to control fans and humidifiers based on different temperature or humidity levels at night, creating a comfortable sleep environment for you.

Maintain Room Comfort
